- Meets the requirements of international standards ISO 12944, NORSOK M501
- Extensive range of colors available through the SIGMA COLOR NETWORK centers
- Part of the SIGMACARE® onboard maintenance service

# SIGMADUR™ 550

## POLYURETHANE FINISH – LONG-LASTING COSMETICS

---

### A DURABLE SOLUTION WITH EXCELLENT AESTHETICS

Aggressive environments demand highly durable systems. Incorporating innovative technology, the *SIGMADUR* range of atmospheric, durable finishes meets these requirements and offers exceptional cosmetics for all atmospheric vessel areas.

*SIGMADUR 550* is an advanced and durable finish that helps to maintain a professional corporate image whilst protecting the asset. This proven polyurethane finish has been tested to meet, and exceed, the exacting international standards of ISO 12944 and NORSOK M501. The ease of application and unlimited recoatability provide value for money, as long-lasting protection, and an outstanding appearance can be achieved that will require significantly less routine maintenance. *SIGMADUR 550* can be applied at new-build, dry dock and onboard.

### LONG-LASTING COSMETICS – EFFECTIVE AND PROVEN PROTECTION FOR DECKS, SUPERSTRUCTURE, AND TOPSIDES

*SIGMADUR 550* is an aliphatic acrylic polyurethane gloss finish coat designed to protect decks, superstructure, and topsides – the most visible parts of a vessel – where lasting, high-quality appearance is most important.

*SIGMADUR 550* cures down to -5°C (23°F), providing outstanding performance in durability, color and gloss retention. The advanced system is proven in service to retain excellent cosmetics over many years, with optimum resistance to the splash of mineral and vegetable oils, paraffins, aliphatic petroleum products and mild chemicals.

The excellent aesthetics of this finish remain even after long exposure periods with no signs of chalking or yellowing. Such attributes are essential to ensuring that the vessel's appearance and company image remain spotless.

### OUTSTANDING AESTHETICS – SUPPLIED AROUND THE GLOBE

The high-gloss *SIGMADUR 550* finish offers excellent color and gloss retention and comes in an extensive range of colors available through the worldwide SIGMA COLOR NETWORK centers.

### INDEPENDENT APPROVAL

*SIGMADUR 550* has been tested to meet, and exceed, the highest international standards, such as ISO 12944, and NORSOK M501.

Certified by DNV as a paint system with low-flame spread in compliance with IMO Solas and Marine Equipment Directive (MED).

### FEATURES

- Finish coating for decks, superstructure, and topsides
- Suitable for application at new-build, in dry dock and for onboard maintenance
- High gloss with up to 10 years' durability
- Non-chalking and non-yellowing
- Excellent application properties with minimal overspray
- Cures at temperatures down to -5°C (23°F)
- Unlimited recoatability
- Resistant to splash of mineral and vegetable oils, paraffins, aliphatic petroleum products and mild chemicals

### BENEFITS

- Excellent application properties by spray application, roller and brush
- Durable for up to 10 years – less maintenance costs
- Flexibility of use – simplifies stock lists
- Easy to apply – less time, more productivity
- Fast drying – reducing maintenance downtime
- Unlimited recoatability
- Outstanding gloss retention – easier cleaning
- Reliable and proven track record
- Available in any color of choice supplied through our global SIGMA COLOR NETWORK centers
- Supported by SIGMACARE® crew support and training package
